SECURITY • RF SYSTEM ENGINEERING • MANAGEMENT CONSULTING

ANOMA CORPORATION PTE. LTD. is the Security and Radio Frequency specialist company established in Singapore. The company focuses on RF technologies applied to safety and security matters. The key strength is our excellent skill set on system engineering to meet the outstanding requirements of customers. Comprehensive services from us include engineering design, procurement, supply, logistics, system integration, testing, commissioning, technical support, and maintenance. The dedicated project team is serving every customer in the ASEAN region.

Our vision is to achieve 100% satisfaction from each of our customers by providing the most suitable solutions to solve the most difficult challenges in safety and security problems. We offer management consultancy to address the technical and project requirements and offer the bridges between technology, human being and cultures.
